*This rate applies when making the copies involves pulling the chart and includes the cost of transmitting the copies by mail when necessary. When the chart does not have to be pulled and the transmission is not by mail, the rate for additional pages applies from the first page.

**This rate applies to copies the transmission required to obtain insured services, such as the transmission of patient chart notes to a new physician, when the patient asks his existing physician to transmit the documents for him.

†No taxes applicable on those services.

‡Taxes apply on fees for exam when services rendered in the case of pre-employment exam or upon the request for insurances.

These fees are based upon the proposed provincial fees of the Fédération des médecins omnipraticiens du Québec.

The patient who believes that the amounts billed are for services insured under the Health Insurance Act can, within five years of payment, make a written claim for reimbursement to the Régie de l'assurance maladie du Québec. When it is of the opinion that the amounts billed are not allowed, the Régie reimburses the patient and recovers the same amount from the professional or third party who billed for the services.
